There are several books by Ian White describing his essences and their uses in detail. ‘Bush Flower Essences’, Ian’s first book, gives an informative picture of his first 50 Bush Flower Essences, as well as detailed information about their preparation and use in all areas of healing. He provides a repertory of illnesses and suggests essences to use for their treatment. This book is designed to allow anyone to feel competent and confident in using these essences to bring about health, harmony and well-being. Illustrated with line drawings and photos.

‘Bush Flower Healing’, the companion volume to Ian’s first book, adds details of a further twelve flower essences as well as important new research on the first fifty essences. It includes greatly expanded repertoires of emotional, mental and spiritual as well as physical conditions and combinations of essences for specific problems. Ian also goes into considerable detail applying his essences in relation to iridology and astrology, goal setting and goal achieving.

‘Australian Bush Flower Remedies’ is a compact reference booklet which gives information on 65 of the essences. It is an invaluable quick reference guide giving key words and a paragraph or two on each essence, one per page. He also gives information on his combination formulas, dosage and how to administer the essences. A most useful tool for practitioners.

‘Animal Healing with Australian Bush Flower Essences’ is the latest book from Bush Biotherapies. It gives practical hints for keeping animals fit and happy as well as dealing with their problems of health and behaviour using the Bush Essences.

This guide to the Australian Bush Flower Essences is the first of a range of handy booklets designed to facilitate the use of Essences for personal healing. Flower and other essences (gem, animal and environmental) are profound healing tools with the potential to make a significant contribution to our personal and spiritual development.

Healthlines is a partnership of professionals, working as therapists in the natural health field, and using essences to great effect to support our clients.

At Healthlines we use, prescribe, teach and make essences ~ in fact, we’re passionate about them. Our purpose is to facilitate their use and to ensure the growth of this divine transformational gift.

Essences are a powerful resource to aid us on our personal quest. They can assist in clearing the blocks that stop an individual getting in touch with their true or higher self ~ their own intuitive part which knows their life purpose. Essences can then help us find the courage, strength and enthusiasm to pursue our goals and dreams in all aspects of our lives, physically, emotionally, mentally and spiritually.

Through essences all the strengths and subtleties of the natural world are directly available to us, and by embracing their healing energies we can more easily be guided towards wholeness.

There are now many different sets of Essences and we carry several of them: Australian Bush, Baileys, Alaskan, Light Heart, Indigo, Wild Earth Animal Essences, Greek Tree Essences and Bach. Most of these are described in detail on our website ~ they are the ones we continue to use ourselves and prescribe for other people.

Our range is constantly growing, so if there is anything you want which you can’t find, please phone. We may have it in stock, or be able to get it for you ~ usually within a few days.

We offer a speedy mail order service, both for practitioners and public. You can order any of the products in this pamphlet either online or by phone.

We are committed to offering only the best quality natural health products available.

1% of all our sales is donated to dedicated environmental organisations.

White Light Essence Pyramid Pack

The CD “White Light”
Sound [pure vibration], is inherent in all things, it has a powerful effect on our cellular structure, on our psyche and our soul. In esoteric numerology each person’s master number corresponds with a specific musical composition. The White Light CD contains these 8 musical masterpieces to help bring into balance anyone with the corresponding master number.

The Book “White Light Essences” by Ian White takes you on a magical journey to some of the world’s most sacred sites where these vibrational Essences were made. These breath taking panoramas have been exquisitely captured in the colour photographs which accompany the text. The book will lead you through each essence’s unique spiritual and soul healing qualities.

Australian Bush Flower Essences
Ian White, creator of the Australian Bush Essences, can take a great deal of credit for the growth of interest in and understanding of essences over the last decade or so. His commitment to education and training, together with their effectiveness, has made his essences some of the most widely known and popular in the world.

The Australian Bush set comprises 69 essences. Each ‘stock’ bottle (concentrate) comes in a 15ml dropper bottle. To create a dosage strength bottle take 7 drops of the selected essence (or up to 5 essences) from the stock bottle and put them into a clean, empty, dropper bottle. Then top this up with a brandy solution (minimum 20% as a preservative). The standard dosage is 7 drops morning and evening from the dosage bottle, but this can be adjusted according to need.

As well as the individual essences, Ian has created a range of combinations in drops, mists and creams to help with particular life issues. These are listed at the end of this pamphlet, as are his books.

The Bush essences are easy to use to address the first level of healing, the issues that are most apparent or current. If you are new to essences, they are a good place to start as the descriptions are clear and accessible. You can expect to see good results fairly quickly, often within just a few days. It is, however, recommended that you take your essences for a good 2 weeks.

There are several ways of choosing essences, either consciously, by selecting from the descriptions, or by using one of several methods to access the unconscious or intuitive mind eg. dowsing or muscle testing. Another, very easy, way of doing this is with the Australian Bush Insight Cards, a powerful tool for intuitive prescribing. These beautiful images are printed on high quality glossy cards and we find them quite amazing. Again and again they demonstrate how we are intuitively drawn to the flowers we need for our healing. They are ideal for children and people who find it difficult to talk about their problems.

We would like to thank Ian for allowing us to use the Bush logo and flower photos reproduced here which are all copyright of Ian White.
